Re: Irving Tissue Buffer Building – ICP Project 1792

The Washington County Sewer District #2 (WCSD) has recently been made aware of this project through local and County planning boards and agencies. The WCSD has many concerns about this project and will ultimately need to approve and permit the relocation of the sanitary sewer that runs through the Irving project site as well as acquire approval from NYSDEC. The WCSD suggests that the appropriate personnel from Irving schedule a meeting with WCSD, and any other interested parties, to discuss this project.
